1

A diagram showing a mounting bracket being attached to a ceiling. Two screws are shown being inserted into the bracket. An upward arrow indicates the direction of installation.

2

A diagram showing the electrical wiring connection. A wiring box with three terminals labeled L (Live), N (Neutral), and PE (Earth) is shown. Wires from the ceiling are connected to these terminals. The wiring box is then mounted to the ceiling bracket.

3

A diagram showing a light bulb being inserted into the socket. A curved arrow indicates the rotation of the bulb as it is screwed in.

4

A diagram showing the assembly of the light shade. Two clips are shown being attached to the sides of the shade. The shade is a spherical mesh structure.

5

A large diagram showing the final assembly of the light fixture. The mounting bracket is attached to the ceiling, a long rod is inserted through the bracket, and the spherical mesh shade is attached to the bottom of the rod. A curved arrow indicates the rotation of the shade.
